

SAP Business Intelligence

Managed Services

OVERVIEW

For nearly a decade, Spinnaker Support has been a trusted provider of third-party support, managed services, and consulting for SAP and related enterprise software products. Mid-size to Fortune 100 enterprises from around the globe and in virtually every industry, have made the switch to Spinnaker Support for reliable, comprehensive, responsive, and affordable SAP services.

Spinnaker Support's SAP BI Managed Services offer ongoing, customized assistance with SAP's Business Intelligence (BI) and reporting products. For SAP customers operating Business Warehouse (BW) 7.0 and later and BusinessObjects (BOBJ) XI R3.1 and later, Spinnaker Support's managed services team performs general system support tasks, system monitoring, application monitoring, data management, performance improvements, and more – regardless of whether the product version remains covered by SAP Support.

SAP BUSINESS WAREHOUSE (BW)

- BI 7.0
- BW 7.01 and later
- BW/4HANA 1.0 and later

SAP BUSINESS OBJECTS (BOBJ)

- SAP BOBJ XI R3.0 and R3.1
- SAP BOBJ BI 4.0 – 4.3

LEADING GLOBAL PROVIDER OF SAP SUPPORT SERVICES

Spinnaker Support has provided SAP managed services and third-party software support for nearly a decade. Our experienced SAP BI engineers support hundreds of SAP instances for top tier customers in all industries across the world.

TODAY'S SAP REPORTING CHALLENGES

SAP customers rely heavily on tools such as SAP BW, SAP BW on HANA, SAP BW/4HANA, and SAP BOBJ to transform raw data into insights and actions that advance their business. But these customers also face a taxing set of operational, technical, and development challenges.

In today's competitive business climate, companies like yours are running fast and lean. This means that departments are understaffed, strapped for time, and often lacking in advanced skills to support operational and management reporting. As a result, process chains run too long, data sources fail to connect, and ad hoc queries are often indecipherable.

SAP's push for a migration to BW/4HANA and current product policies compound these problems. Older versions of these essential and reliable products no longer receive updates or even support.

SPINNAKER SUPPORT'S BI MANAGED SERVICES FOR SAP

Savvy enterprises are turning to Spinnaker Support's SAP BI Managed Services for expert, cost-effective assistance with SAP's reporting products.

BW and BOBJ reports can be complex, time-consuming, and sensitive to modifications. Spinnaker Support helps customers by delivering customized reporting managed services based on an assessment of your current state and anticipated needs. These services range from day-to-day system monitoring and data loading, to monthly housekeeping and on-demand report template modification.

With Spinnaker Support's expert managed services team, reporting challenges that have been occurring for months become a thing of the past. BI managed services are a strategic, affordable solution that can streamline your SAP operations and deliver ongoing stability, higher performance, and longer-term innovation.

Customers can choose to contract these managed services as standalone or in combination with our third-party software support.
